

Take the headache out of managing your next event

Are you forecasting the cost of your event accurately? Do your events run to budget? Is the scheduling for your venue getting out of hand? Are you able to quickly replace absent staff

There is a better way.

Taking both your employees and client preferences into consideration, we optimise your remote or residential workforce. We provide mobile collection of hours worked, along with geodata confirming location, which can then be used to pay your staff and to invoice your clients.

Our Expertise - your peace of mind

Drive efficiency

Automating collection of data from remote locations and enabling self-service for your off-site workforce

Workforce Optimisation

Match the right staff to the right client
optimise the work order for daily scheduling

Payroll & Client billing

Award interpretation with seamless integration to your payroll and automated invoice and billing

Intelligent workforce solutions.

Tambla recognise the challenges associated with the rostering and scheduling of staff in businesses with a requirement for staff to visit remote or home based locations.

Drive Efficiency.

Our Community & Field Services module was developed specifically for the aged and health care industries.

It is designed to manage a mobile workforce engaged in home visits or servicing multiple locations and clients.

With Tambla' Community & Field Services you can:

- Minimise administration overheads and manual data entry
- Automate the time collection from your mobile workforce
- Improved cancellation management

Workforce Optimisation.

Our solution optimises staff allocation based on qualifications, client preference and location.

We provide users with the ability to view automatically optimised service schedules. Fully integrated GPS geolocation and mapping capabilities enable you to track resources, capture visiting times, automate kilometres travelled and travel time calculations.

Our use of these technologies provides smart routing and optimisation of client visits and appointments.

Payroll & Client Billing.

Seamless integration into your existing payroll system eliminates the need for manual intervention and reduces human error.

Tambla' Community & Field Services ensures that the correct hours are transferred to payroll accurately and your workforce is paid correctly and on time.

We recognise that manually interpreting conditions and rules is time-consuming and complex - especially in the health sector. Our Award Interpretation engine has been developed continually for over 30 years, here in Australia, among some of the most rigorous labour laws.

Your Business.

We recognise that every business is different.

Tambla WFM easily scales to accommodate current and future business requirements. Our cloud based solution and modular approach offers the full breadth of functionality needed to optimise the efficiency and productivity of your workforce - with a full complement of optional modules and a range of scheduling methodologies.

Community & Field Services.
