

Tambla

Intelligent Workforce Solutions
for **Health & Aged Care**

Meeting the complex requirements of patient care in a variety of settings, while controlling costs.

Centralised Administration

Whether dozens of staff in one location or thousands across multiple, our solution provides you with the centralised administrative capability you need to run your business more efficiently

Payroll Integration & Billing

Seamless integration into your existing payroll system eliminates the need for manual intervention. Tambla WFM ensures that the correct hours are transferred automatically to payroll. Our client billing option enables accurate and timely invoices to be generated based on the care provided when required.

Simple Scheduling & Rostering

Take the complexity out of allocating labour at the time of scheduling while enabling compliance with complex patient requirements, including client preferences and service history. Optimise the travel route between patient for Client & Field requirements. Simplify the time-consuming and complex task of staff scheduling and generating the optimum schedule every time.

Reporting

Our fully integrated reporting suite provides information when you need it.

Self-Service

With high numbers of remote or mobile staff, providing them with the right tools is critical to your business. Our mobile ready applications improve employee productivity. New, cancelled or changed appointments are automatically sent through to the employees' mobile device, updating their schedule for the rest of the day. The solution also provides staff with the ability to access their schedules, accept & reject shifts, submit availability changes for approval and, view & submit leave requests.

Safety

Tambla WHS provides you with an auditable account, documenting the procedures used and the results of the identification, notification, analysis and mitigation process.

We understand the many challenges of managing a health & aged care workforce.

With health care professionals on the move, visiting patients at home, in hospital, or in an aged care facility, scheduling with both patient requirements and employee preferences taken into consideration can become complex.

Time & Attendance

From biometric devices to mobile applications, Tambla time collection options put an end to the laborious task of manually collecting and entering employee time sheet information. Our automated data collection provides real-time insight when needed.

Award Interpretation

From interpreting employee time sheets to costing rosters, our comprehensive award interpretation manages the most complex work rules.

Our Expertise

Your Peace Of Mind

Tambla Workforce Management (WFM) introduces our Client Services module which works in conjunction with our workforce management solution to provide you with a complete solution to manage your health care workforce.

With an increasing number of people preferring to remain in their own home whilst receiving care, managing how these patients are serviced requires more in-depth workforce management.

Tambla WFM with the client services module is designed to manage both an on-site and mobile workforce engaged in home visits or servicing multiple locations and clients.

The following is a snapshot of how **Tambla WFM** helps our customers address the many demands associated with optimising in a complex environment.

Drive Efficiency

Automating manual tasks for administrators and enabling self-service across your workforce

Optimisation

Better utilisation of your resources, ensuring optimum patient care

Mobile Workforce

Our client services module enables you to manage your off-site workforce effectively & efficiently
