Tambla

Intelligent Workforce Solutions for **Time & Attendance**

Tambla's Time & Attendance solution

lets organisations increase operating efficiencies, meet budget requirements and address changing needs and regulations. No matter the size of your organisation, better management of employee-related schedules and costs is often the single most effective way to improve productivity and the bottom line.

Data Collection

With easy integration into your existing time capture devices, or using Tambla's own, our automated data collection gives you insight when needed. Quickly and easily monitor attendance and absence, control labour costs and drive operational efficiency.

Options include:
• swipe card
• biometrics
• PIN
• mobile
• POS/PC terminals.

Award interpretation

We recognise that manually interpreting conditions and rules is time-consuming and complex. Our Award Interpretation engine has been developed continually for over 30 years here, in Australia, among some of the most rigorous labour laws.

As an integral part of the solution, it ensures that information sent to payroll is accurate and that employees are paid correctly and on time, allowing your staff to better manage rostering budgets and company guidelines rather than data input.

Payroll Integration

Seamless integration into your existing payroll system eliminates the need for manual intervention and reduces human error. Tambla ensures that the correct hours are transferred to payroll accurately and your workforce is paid correctly and on time. We recognise that every business is different. Tambla WFM easily scales to accommodate current and future business requirements.

Our cloud-based solution and modular approach offer the full breadth of functionality needed to optimise the efficiency and productivity of your workforce, with a full complement of optional modules and a range of scheduling methodologies.

Time & attendance
